

ISIS release pictures of their new gold coins they say will 'break capitalist enslavement' - so why are they still paying their deranged gunmen in US dollars?

- The hour long video shows the smelting of coins, said to be **ISIS's** currency
- **ISIS claim to have created gold dinars, silver dirhams and copper fulus**
- **The jihadi group continues to pay its fighters in dollars despite new coins**
- **New coin currency appears to be the group's latest publicity stunt**

ISIS have released a new hour long video, showing off their latest propaganda tool - their very own coin currency.

The news of ISIS's new media release comes as the WorldPR Global Leadership Ranking 2015 placed ISIS higher than the Vatican for its international brand recognition.

Despite the Vatican's 2,000 year existence, the relatively new group ISIS have managed to capture the world's attention through their harrowing videos and victories on the battlefield.
